

GUIDE TO YOUR UNDER MATTRESS PURCHASE

To determine the maximum size of your under mattress please follow the instructions below:

- 1) Select a shape from the menu “Chose an option” and relate it to a rectangle (see examples)

Example n. 1

Example n.2

- 2) The corners with hatching drawn inside, represent the “scrap” material that you will receive along with the product to allow you to shape it and use it in those areas subject to condensation.
- 3) Measure “A” and insert it in the relevant box and do the same with “B”.
- 4) The SQM total will pop up automatically along with the product price.
- 5) You will now be able to complete your purchase by following the guided procedure.
- 6) We will then send you enough “dime” cardboard to be placed on your mattress.
- 7) Cut out the excess to follow the under mattress shape.
- 8) Sign the cardboard and send it back to us along with a picture of your mattress. Everything will be returned to you when we send you the purchased under mattress.
- 9) By following this procedure you’ll make sure the under mattress is perfectly sized and measured.

Thank you
